

**Proceedings of the DGMK-Conference  
"Future Feedstocks  
for Fuels and Chemicals"**

September 29 – October 1, Berlin, Germany  
ISBN 3-936418-81-1

## CONTENTS

	Page
<p><b>New Technologies in Biodiesel Production</b> E. Santacesaria , M. Di Serio, R. Tesser, L. Casale</p>	7
<p><b>A new heterogeneous process catalyst for the biodiesel production</b> O. Meyer, F. Rößner, R. A. Rakoczy, R. W. Fischer <a href="#">(Abstract)</a></p>	19
<p><b>Vegetable Oil Hydrotreating for Production of High Quality Diesel Components</b> M. Endisch, U. Balfanz, M. Olschar, Th. Kuchling <a href="#">(Abstract)</a></p>	27
<p><b>Hydrocracking of vegetable oil using bifunctional, porous catalyst systems</b> O. Busse, K. Räuchle, H. Toufar , W. Reschetilowski <a href="#">(Abstract)</a></p>	35
<p><b>Raw Material Change in the Chemical Industry</b> R. Diercks</p>	43
<p><b>Fundamentals of the Oxidative Conversion of Methane to Ethylene, Methanol and Formaldehyde</b> E. Kondratenko</p>	45
<p><b>The Dehydroalkylation of Toluene with Ethane – an Example for the Non-Oxidative Activation of Light Alkanes</b> Y. Traa <a href="#">(Abstract)</a></p>	59
<p><b>Isoprene – Applications Beyond Polymers</b> S. Reyer, A. Behr <a href="#">(Abstract)</a></p>	67
<p><b>The gas-phase ammocidation of n-hexane to unsaturated 1,6-C<sub>6</sub> dinitriles, intermediates for 1,6-hexamethylenediamine synthesis</b> N. Ballarini, A. Battisti, A. Castelli, F. Cavani, C. Lucarelli, P. Marion, P. Righi, A. Turrini <a href="#">(Abstract)</a></p>	73

<b>Chemicals from Biomass</b> T. Tacke	<b>81</b>
<b>Coal Processing and Fuels from Coal - State of the Art</b> R. Abraham	<b>89</b>
<b>Energy from aquatic biomass: an integrated approach to biodiesel and hydrogen production</b> M. Aresta, A. Dibenedetto <a href="#">(Abstract)</a>	<b>101</b>
<b>High Throughput Catalyst Optimization Program for the Gas-to Liquids (GTL) Technologies Methanol-to-Gasoline (MTG), Higher Alcohol Synthesis (HAS) and Fischer-Tropsch-Synthesis (FTS)</b> H. Dathe, K.-F. Finger, A. Haas, P. Kolb, A. Sundermann, G. Wasserschaff <a href="#">(Abstract)</a>	<b>109</b>
<b>Diesel yield according to Fischer-Tropsch process conditions.</b> M-C. Marion, F. Hugues <a href="#">(Abstract)</a>	<b>117</b>
<b>Glycerol derivatives as fuel components</b> D. Bianchi, E. Batistelle <a href="#">(Abstract)</a>	<b>125</b>
<b>Fuels and Petrochemicals from Oils derived from Oil Sands</b> M.C. Oballa	<b>133</b>
<b>Telomerization of crude glycerol towards new surfactant molecules</b> R. Palkovits, C. A. Kruithof, I. Nieddu, R. J. M. Klein-Gebbink, B. M. Weckhuysen <a href="#">(Abstract)</a>	<b>145</b>
<b>Solid-State Hydrogenation/Hydrogenolysis of High-Rank Bituminous Coals with Gaseous Catalysts: New Perspectives for Coal Liquefaction and Metallurgical Coke Production</b> M. W. Haenel, U. B. Richter, A. Rufinska <a href="#">(Abstract)</a>	<b>153</b>
<b>Heterogeneous Catalysis for the Production of Fuels and Chemicals from Lignocellulosic Feedstocks</b> R. Rinaldi, R. Palkovits, F. Schüth <a href="#">(Abstract)</a>	<b>161</b>

## Postersession:

- Influence of operating method on reforming of glycerol in aqueous phase** 169  
U. Armbruster, S. Umbarkar, A. Biradar, M. Dongare, A. Datta, S. Darmora, A. Martin  
(Abstract)
- Dehydration of glycerol in gas phase using heteropolyacid 177 catalysts as active compounds** 177  
H. Atia, U. Armbruster, A. Martin  
(Abstract)
- Catalytic transformation of triglycerides in refineries – a promising route to clean fuels and feedstocks for petrochemistry** 185  
D. Kubička, J. Lederer, Z. Bělohav  
(Abstract)
- Hydrogenation of glycerol to lower alcohols** 193  
J. Kolena, P. Morávek, J. Lederer, G. Sebor, J. Chudoba  
(Abstract)
- New catalyst for the conversion of glycerine generated by bio-diesel production into a fuel constituent** 201  
F. Rößner, P. Adryan, J. Riedel, R. W. Fischer, R. A. Rakoczy  
(Abstract)
- From biomass to value-added chemicals: Conversion of glycerol over modified zeolites** 209  
M. Göhlich, K. Räuchle, H. Toufar, W. Reschetilowski  
(Abstract)
- Direct mild partial oxidation of benzene and methane in catalytic and photocatalytic membrane reactors** 217  
R. Molinari, T. Poerio, A. Caruso, P. Argurio, S. M. Carnevale  
(Abstract)
- The liquid-phase oxidation of cyclohexanone with oxygen, catalysed by Keggin-type polyoxometalates. A cleaner alternative to the current industrial process for adipic acid synthesis** 225  
N. Ballarini, F. Cavani, L. Casagrandi, T. D'Allessandro, A. Frattini, P. Accorinti, S. Alini, P. Babini  
(Abstract)
- Gas phase acetoxylation of toluene to benzyl acetate over Sb-Pd/TiO<sub>2</sub> catalysts: Effect of Sb loading** 233  
V. Narayana Kalevaru, A. Benhmid, J. Radnik, B. Lücke  
(Abstract)

## IV

- Research Methane Hydrate Meta-stable Property for Application to Natural Gas Storage and Transportation** 241  
Dou Bin, Jiang Guosheng, Wu Xiang, Zhang Ling, Ning Fulong  
([Abstract](#))
- Hydroxycarbonylation of benzylic derivatives in ionic liquid media** 249  
A.L. Lapidus, O.L. Eliseev, T.N. Bondarenko, N.H. Chau  
([Abstract](#))
- Surface properties and catalytic performance of supported cobalt catalysts for Fischer-Tropsch synthesis** 257  
A.L. Lapidus, O.L. Eliseev, P.E. Davydov, D.S. Alexeev  
([Abstract](#))
- Carbon Nanomaterials as Supports for Fischer-Tropsch Catalysts** 263  
A. Jung, C. Kern, A. Jess  
([Abstract](#))
- Modelling of Internal Diffusion Limitations in Fischer-Tropsch Catalysts** 269  
A. Jung, C. Kern, A. Jess  
([Abstract](#))
- Olefin Production by Oxidative Dehydrogenation of C<sub>3</sub>-C<sub>4</sub>-Paraffins in CO<sub>2</sub> Presence** 275  
A.L. Lapidus, N.A. Gaidai, Yu.A. Agafonov, N.V. Nekrasov, D.V. Trushin, A.V. Makashov, M.A. Botavina, G. Martra, S. Coluccia  
([Abstract](#))
- Methanol Conversion on Zeolites – Dehydrogenation of “Retainate” and Methane Formation as Essential Reactions** 283  
H. Schulz  
([Abstract](#))
- Selective Synthesis of Lower Olefins from Methanol and Dimethyl Ether on ZSM-5 and SAPO-34 Zeolite Catalysts** 291  
A. V. Abramova, A. A. Panin, R. V. Kulumbegov  
([Abstract](#))
- Catalytic Hydrocracking of Lignins to Useful Aromatic Feedstocks** 299  
D. Meier  
([Abstract](#))
